- License:BSD
- Status:Active

Project Description: ExaBGP provides a convenient way to implement Software Defined Networking by transforming BGP messages into friendly plain text or JSON, which can then be easily handled by simple scripts or your BSS/OSS.

Further info:

ExaBGP is a versatile tool which is best suited for :

- providing cross data centers failover solutions migrating /32 service IP.
- mitigating network attacks, centrally deploying network level filters (blackhole and/or flowspec)
- gathering network information (using BMP, or BGP with Add-Path)
